Sterling Daily (6/29/24): Three Dan Brown Movies [Jesus Both^a Father and Son]

by Sterling D. Allen, 228033; USC F

June 29, 2024 Movies⁺ highlights & [commentary]

Movies (Dan Brown) ^{don't like origin} [one of my favs]

(9.7) - © 2006 The Da Vinci Code While I love the movie, I take exception with Dan's premise that if Jesus was married and had offspring then this would mean he is not the Son of God. I find that premise to be ridiculous, and am surprised that someone as smart as Dan Brown could miss on this. D&C 86:9 depicts Jesus many offspring: "For ye are lawful heirs, according to the flesh, and have been hid from the world with Christ in God..." ¶ Prof. Langdon's following of coded secrets is something I can very much relate to in my AB unfoldings, except my scenario doesn't involve violence. I love the final scene where Mary's Sarcophagus is shown to be under the inverted transparent pyramid at the Louvre museum in France, hidden in plain sight. ¶ On the side, I should mention that I believe that my inventor friend Raphael Morgado very well could be a present incarnation of who was Leonardo Da Vinci. He shares many of the same attributes. (Dan Brown was likely Isaac Newton.)

(9.6) - © 2009 Angels & Demons ^{Soops - this is in the Inferno movie} The WHO lady, Elizabeth, got out of a car with license plate # B. 666 P?, Fitting my paradigm that the WHO today is largely devoted

to a conspiratorial agenda of global control, (2) not health. It's one of the most up-side-down organizations that there is. The movie depicts her as one of the good players, but she's riding in an evil vehicle.

Langdon lacks (like Dan Brown) lacks the eyes to recognize God's superintendence in his life. Why didn't he pair up with Sophie? (in ^{Da Vinci Code} Angels & Demons.)

Inferno Technical/Logistical problems w/ Angels & Demons: The power cycling to find the bomb location could have been less than a second, not a minute⁴. The air in the Vatican library chambers would not have gone down in oxygen in such a large room as quickly as depicted. The battery life would not have dropped by just a minute⁴ from the colder environment. The helicopter should have headed away from population centers, not go straight up. If the anti-matter caused water to explode like was seen in the fountains, every living thing ~~would~~ in line ~~#~~ vicinity of the blast would have responded similarly.

(9.3) . Inferno (see my comments above.)

Shows

(9.5) . To The Rescue ^{5230a} Tesla (dog) chewed on electric cord, took out part of mouth, nose, ~~and~~ one eye. Loved back to vitality. Dory (dog) found in cage thrown in a river, snagged on branch. Cared back to vitality. "Dog's have a deep capacity for forgiveness." Sweet Pea (fighting dog) found in trash bin. Recovered to be loving family dog.

(9.4) . XPloration Space: The space race between Musk & Bezos, who sees him self as the "tortoise" in the race.
