T* ^{my} Nathan (Pratt, UT) Brother, Nate, Working on Vote Securing App.
 Uses block chain tech., can be operated from own phone - list upcoming ballot questions/options, give info about candidates / options. Ensure that the person is who they claim to be. Disallow non-citizens. Enable person to ensure that their vote (secure, not-disclosed) was lodged (once). Need to accommodate people (2-3%) who don't have a cell phone, via local vote precinct. Voting can be done / tabulated in one day, without lines, without travel, secure, accurate. "Will take a moon-shot pull off," e.g. Musk-level talent. He doesn't think it will be ready in time for 2024. I can't help but think it can. Doesn't require infrastructure (no polling machines, just phone app). He's brilliant with computers. [Dem.s will hate it. Can't cheat.]
