

# Sterling News

by Sterling D. Allan, 228033

June 19,

Hello, again KBYU TV. Here's another follow-up to my letters inviting you to come record our 6/26 talent show, followed by my B.O.P. hearing the next morning. (\*6/20) Then, on 6/12, I sent you a letter to you proposing a "Transition Reality Show" to track my progress from life in prison to life on the outside with KBYU TV's help (because I want it from my passion and developed talents).

In this present letter, I propose a project ~~for that~~ we could do jointly, bringing back <sup>(KBYU TV's)</sup> your news service, but with some important variations. It would be pro-freedom, anti-conspiracy and corruption, in the spirit of Ezra Taft Benson. It would cover global issues as well as sample local matters. It would quickly surpass other news agencies such as BBC, <sup>ENR,</sup> ~~F-21A~~, which have heavy Marxist agendas, <sup>being</sup> bought into and controlled by the <sup>Satanic</sup> conspiracy. AFB would be a primary content filter. Truth resonates with people and will win out. RAU doesn't have an international coverage program. There's a void there that needs to be filled. You & I could be co-anchors. ("You" being the person who has been receiving & processing my letters." ☺)

My best friend growing up, next door neighbor, then roommate at BYU, and bass in our Upper Classmen BYU barbershop quartet, Todd Crawford, worked at KBYU TV while we were going to BYU. He was an engineer. So I know you used to have a live ~~news~~ daily news program.

I'm guessing that it was discontinued because of the Church's adamant neutrality on political issues, having members from a wide spectrum of political leanings. You can't do news without bias. Truth should be the standard, and is the supposed ideal of all news agencies, but in reality, they get infiltrated and controlled by the conspiracy if they're not vigilant.

The Church, e.g. via KBYU TV, is ordained to be a light to the world. Presently, they're aligned more with the conspiracy than with ETB-like awareness. That has to change. It needs to be remedied. Otherwise the salt loses its savor, and you know what that leads to (3rd Ne 16:15).

The primary purpose of the broadcast would be to provide inspired perspective on key daily events and emerging trends.

No, I'm not naive to think this would be an easy sell to KBYU-TV, nor the sponsoring Church, nor the BYU, nor the audience.

(3)

It would seem that this would only get the green light after we evoke the r.c. and do the 2 Chron. 7:14 prayer event, so the Lord's people have a new heart, awakened, remorseful, and forgiven for their political waywardness. However, I can't help but think that pushing for this prior to that happening will be an important part of your stepping into this calling - taking a very controversial stand for God, which you know will not be favorably received, but you advocate anyway, as an intercessor, standing in the gap for humanity. This will enable you to demonstrate your all-in status in a huge way that people will be able to relate to. Bigger than Esther stepping forth on behalf of her people. More at stake, harder to do.

<6/21>

On 6/19, I looked up the ASOT sum of "Sterling News" = 1253. The def.s in vicinity of OT def. H1253 have the meaning "pure", which is a meaning listed for sterling in larger dictionaries. ~~At~~ The def.s in vicinity of NT def. G1253 seem to have to do with depicting how KBYU TV might respond to this proposal to do such a news service. This<sup>is</sup> especially pronounced in def. "G1255 to talk throughout a company, i.e. converse or (generally) publish: - commune, noise a broad." Def. G1253 itself is consistent

with the notion of the inspired perspective we'd have as the hallmark of our service, with meanings, "judicial estimation [H6666 righteous justice]: - discern(ing), disputation [calling out evil]."

# (OT def. H1250, in this number - vicinity, means, "wheat" :- wheat)

The next def. depicts the pushback that this idea would spur: "Gr 1284 to hinder altogether, i.e. utterly prohibit: - forbid." Similarly, the def. prior to 1253 means, "to separate thoroughly [wheat from tares], i.e. to withdraw from, oppose; fig. to discriminate (decide), or hesitate: - contend [not of God - Satan rises against God], make (to) differ, discern, stagger, waver."

The def. just before that has an indisputably direct relevance: "Gr 1251 to hear throughout, i.e. patiently listen (to a prisoner's plea) - hear." (That's exactly what is written in Strong's '07.)

# (in the spirit of 2Ne. 30:17 "there is nothing secret save it shall be revealed...")

Def. Gr. 1256 also relates to the publishing aspect: "to say thoroughly, i.e. discuss [e.g. interviews, viewer comments]: - dispute (A) exposing evil, bad narratives; (B) considering & weighing opposing views; (C) defending truth, preach (unto) [inspired perspectives], reason (with), speak."

<6/22> These now prepare us to appreciate the OT def. just after H1253, which seems to say, "after considering all things, KBYU TV selects Sterling

<owe> to serve in this roll with them (including you &).

5

H1254 create [the news service], select [you & me as anchors]:- choose [Isa. 49:7 "he shall choose thee"], creator, dispatch [reporters, e.g. you & me via tp 0], do [the project], make [a great news programme]...

Even without the ChaffB gifts of the Spirit # (N→O, Appendix A-1), to augment our reporting abilities (more on this below), though tackling this task would be a good stretch for me, I'm convinced that with God's assistance (which is <sup>avail-</sup>able to everyone who will seek it and do what it takes to receive it), I could do this task well.

There is definitely a void (international, Christianity-rooted, truth-founded news) that needs to be filled. When I tackled Free Energy News in 2000, I quickly shot to #1 almost right out of the gate. For three years, when you Googled "Tesla Motors" ~~the~~ my PESWiki.com page was the first link that showed up, even before their website and Wikipedia, which were usually #2 & 3.

2 Ne. 30:16, 17 could be the root of the mission statement. Of course, once the IT is activated, by e.g. you stepping forward, all in, synced up, then we will benefit from all the tools/gifts of the Spirit, especially the IT and tp. Being the first out of the gate with these tools/gifts will give us an advantage that we'll be able to maintain, by virtue of having been first and the launchers

of these capabilities.

The advantages that the II and ~~to~~ will give us would be like comparing a modern TV news studio to something in the Dark Ages. We'll be able to select our ~~background~~ backdrop to whatever we want, at the speed of thought. We can ~~to~~ go to any location we want (AFB) at the speed of thought. The ~~sound and image~~ sound and image will be perfect fidelity. The producer can select whatever angle or distance perspective they want, at the speed of thought. All content is AFB, automatically — tailored to each specific viewer. We can access whatever info we want (AFB) at the speed of thought. We can edit/compile/abbreviate highlights at the speed of thought. All viewers will be able to tell that what we are saying is true, able to access the source material at the speed of thought (if they're AFB).

There's no such thing as "Deep Fake," because the II would immediately expose that. The II leapfrogs us way ahead of AI, but with the AFB conscience.

Let's do this! ☺
