T the radical college pro-Palestinian protests, many wealthy Jewish

Demos are jumping behind Tr.

T • AGT The Freaky 13-yo<sup>Contortionist</sup> from India was Satan<sup>inspired/</sup>-inspiring. I turned

it off after a few seconds so as to not subject myself to

that. I loved the last performance of the H.S. janitor who

sang <sup>Sourney</sup> Journey (?)'s song, sounding just like them. It illustrates

someone finally stepping into their God-given gifts. I do dis-

agree with Howie's saying the (black) country music original

didn't have a "hook". It was very catchy — and Satan-inspired

to woo people to excuse doing evil. Her apparel was very

immodest, designed to inspire lust, as <sup>were</sup> ~~was~~ the song lyrics.

2 y.o. math w/z was cute<sup>and impressive</sup>, but I can't see how it

could be turned into a Vegas show. Not enough variety.

The "naked" Japanese act is inappropriate.

### Non-Denom. Print-Outs (Viola)

- Brestbart 2/18 "The Great 'Transhumanism' Reset: 'Smart Dust' Spying on Your Brain..." Small chips (20  $\mu$ m - 1mm) 'dust' can be conveyed in a handshake, providing 14 days of monitoring of a wide variety of data. Berkeley<sup>ely</sup> said 'newal dust' sensors could be implanted to stimulate nerves & muscles and monitor activity of dif. organs. MEMS = microelectromechanical systems. Musk's Neuralink goal is to connect human brain to a computer. WEF's Klaus Schwab imagines trans-humanist chips that could be a kind of "fusion of the physical, digital and biological world"; "to intrude into the hitherto private space of our minds, reading our thoughts and influencing our behavior." "[The] Fourth Industrial Revolution technologies will not stop at becoming part of the physical world ~~also~~ around us; they will become part of us." "[It] will change not only what we do but also who we are. It will affect our identity and all the issues associated with it: our sense of privacy, our notions of ownership, our consumption patterns, the time we devote to work and leisure, and how we develop our careers, cultivate our skills, meet people, and nurture relationships." [The dif. between this and the IT that will soon emerge/be activated, is that the IT does not violate agency/free will.} And the IT's folter/bras is AFB, not Marxism godlessness.]
