

# Out Soon...

Hello Stuart,

6/7/23

This evening, I asked my dad to contact you by email to get from you the password & Instructions document I prepared before my arrest to be able to continue my work.

Yes, I see a high chance that I could have my sentence terminated as a result of my 6/27 Board of Pardons hearing. (Public is allowed. Supportive written statements should be relayed to the B.O.P. Spoken statements won't be permitted except from me. Scheduled for 8:30 am. Arrive at least half an hour prior.) I'd like to be as ready as possible to resume my work when I get out.

My first priority will be my work as seen at a site an inmate friend's mother put up for me: [IndComing.org](http://IndComing.org). It includes (A) a book I wrote, (B) 114+ letters to the editor of *The Epoch Times*, and (C) a few blog posts for those who have read my book. Some of my B.O.P. materials will hopefully be posted to the blog as well.

I'd appreciate it if you could put the word out that I could be released soon, and that I'm looking for free energy news tips from around the world, including:

- Synopses of milestones of what occurred during the 7 years I've been incarcerated
- Great developments presently unfolding

(2)

- Strongest F.E. companies at present
- Top 10 contenders at present
- Contact info of best companies & investors
- New free energy genes that have emerged
- Best articles to come along
- Other tangential highlights of interest to our F.E. community.

In conveying written info about these things, recall that I can't ~~at~~ clock on paper (☹) so please include the root domain name and title names so I can pull up the full w/ when I get out. Let me know ~~if~~ I can/can't include / credit your name? and contact ~~if~~ info so we can stay in touch (including mailing address).

My mailing address is: Sterling D. Allan, 228033;  
P.O. Box 165300; SLC, UT 84116 USA

Two articles I've written about F.E. during my incarceration, available from [IndCombing.org](http://IndCombing.org) include:

- Blog > (2/17/2018) Four Free Energy Stories from Prison - Inmate said his father worked with Einstein on Philadelphia Project, Had (A) 125 kw QMOGen that powered 1 million acre ranch for 40 years, (B) anti-gravity toy cart; discusses how.
- Editorials > (8/27/2022) Good Flip on EV Trends

You're welcome to post this letter PDF.
