A common theme among talking heads is that the sabotage of the two Nord Stream pipelines could trigger World War III. On 9/29, on Dr. Gina Landin's "PrimeTime" RAV TV show, she interviewed Bill Hennessy (sp?) of Gateway Pundit. He made a strong case that the attack was done by U.S. Forces. He reported on U.S. Military operations recently in the attack vicinity. It involved practicing detonating undersea demolitions from a distance.

U.S. Navy amphibious exercises were done within a week of the attack. And, of course, we have Biden's ^{pre-emptive} statement declaring U.S. ability and intention to take out Nord Stream 2 if Russia attacked Ukraine.

Given the Marxist conspirators' pulling out all stops to collapse the United States as a free nation, and given the strong momentum the Mid-God Republicans ^{presently} have to win the House and Senate in the midterms, it is not at all inconceivable that they would want to trigger World War III in order to either cancel the election, or to swing the voters in support of ^{the} Establishment, which is the typical

(If it wasn't already happened by the time this editorial is published)

response of citizens at times of national peril.

A MAGA win, Nov. 8, would not just spell their defeat. It would include their being exposed and brought to justice for their treason. So they'll do whatever it takes to keep that from happening.

But if our societal repentance is sufficient, ^{<step>} their Black Swan intentions can be nullified by God.

Sterling D. Allan
