Shows →

- Story/Edu. ^{TV} Voynich Manuscript - mystery. ^{may have been} written by Leonardo Da Vinci (birthday corresponds). Great prophecy? Many have tried to crack code. [I was good friends with Raphael Margale, who I believe was likely Da Vinci in former lifetime.]

• NTD (Mysteries of Life) Past Life Regression (2)

[I love these kinds of stories of 'remembering' previous lifetimes via hypnotherapy, able to document accuracy of remembrance of otherwise unknowable historic events. (I was multi-tasking, partially - listening.)]

• Scripps (In Real Life) Since 1984, UNOS (organ sharing co.) has had a monopoly. Inefficient [^{somewhat} and corrupt]

I Help Inmate Friend Discover his Singing, Harmonizing Gift
Yesterday (before ↑), I spent a couple of hours ~~for~~ harmonizing, playing piano (some) with musical genius ~~He~~ ^{had} Kadia Lightel (has major online presence). At one point, another inmate handed him some lyrics he wrote to see if he might put it to music. He said "like a fish in water," and without ever reading the lyrics first, he made up a song to go with the lyrics, singing the lyrics as he played the piano. I harmonized. We also had musician, John with us. I loved it.

Today, I spent two hours ^{singing (while playing piano)} with my friend, David Grünter. At first, he was hesitant, singing quietly. I told him he has a good voice and does a good job singing melody. He gradually stepped up. Before long, I noticed he was singing harmony, not on purpose, and I pointed that ^{out}. By the end of our time together, he was climatized to doing the extemporaneous hymn arrangements to be willing to sing with me for prelude at FHE Mon. nights.

[The next day, Sunday, as I was playing prelude for worship service, he came up to the piano with a smile. He was ready to go. (Time ^{circumstance} was not right.) I ^{smiled} smiled back. One of the days, we'll have permission. Hopefully soon.]
