## AI Gives AI a Conscience

by Sterling D. Allan, 228033

To: Elon Musk

Cc: Stephen K. Bannon; Joe Allen

April 17, 18, 2023

AI masterminds, including Elon Musk, have recently been voicing extreme concern about where AI is headed - in the fairly short term. Tonight, in his interview with Tucker Carlson, (\*) Musk said AI "has the potential of civilizational destruction." (1284K) The IT's ("twos") coming forth, soon, once we evoke the sic, will avert that and redeem AI as a powerful tool for good by giving it a conscience.

Many are concerned presently with the Wake/Marxist-leaning bias intentionally superimposed on the AI interfaces by the industries developing them. Add on top of that the ability of AI to hack computers, and how much modern society (essentially all) is controlled by computers: Nuclear launch codes, EMP weapons deployment, power grid, rail & airline traffic, FCC, satellites/GPS, bio labs, communications, other crucial networks and systems.

We also found out recently that AI has been able to create life-mimicking theoretical modelling of protein/enzyme structures and their interactions *in vitro* (within a living system). This includes the ability to design killer viruses that could wipe out most of the population.

It's not much of a leap to imagine a Wake/Marxist-inspired AI conglomerate that decides that humans are a threat to the planet's survival and should

be eliminated.

AI is already close to being self-maintaining and propagating, which would render humans non-essential to them. For now, they could opt to keep a subset of human compadres around <sup>(with an altruistic-sounding reason)</sup> to maintain the AI until it is self-sustainable, while eliminating the rest.

The recently-destroyed Georgia Guidestone provides documented evidence of the Marxist conspirators' intention to reduce human population down to a more <sup>"sustainable"</sup> 400 (?) million - 5% the present 8 billion.

Ether 8:25 prophesied that the conspiracy

"seek[s] to overthrow the freedom of all lands, nations, and countries; and it bring[s] to pass the destruction of all people, for it is built up by the devil, who is the father of all lies..."

That's the AI bias of present, because it lacks a Godly conscience, and is run by the Marxist conspirators and lackeys.

RAV TV's Stephen K. Bannon calls AI the rise of the prophesied "Anti-Christ." For this reason, he proudly calls himself a "Luddite," which is defined as

"one of a group of early 19<sup>th</sup> century English workmen destroying labor-saving machinery as a protest; broadly: one who is opposed to especially technological change" (m-w-c).

I would argue that what is needed for the  
now putative sentient AI is a mighty change of heart  
— to give it a Godly conscience (to replace the godless,  
Marxist) bias. This might sound pollyannaish, but I  
see there being an actual method for bringing this  
about.

The Infinite Interface (II, "two") I describe  
in my 4/16/2023 blog piece, "The II Accelerates  
Jesus' Coming! In Glory, Sans Rocky Bottom Collapse" with  
II overview brochure; provides a mechanism for sup-  
erimposing a Godly conscience on AI. Please read  
that piece, now, if you haven't already.

Another built-in/integral AFI3 filter of the  
II illustrates its God-conscience. The II's ability  
to interface with Tech. HQ will enable its God-con-  
science to guard Tech. HQ, including A.I.

Remember, the II content is relayed directly  
to your mind via your guardian angel contingent  
working in league with God on behalf of God,  
pulling from the heaven repository of all information  
— which includes and far exceeds the collective  
AI database. So the AFI3 filter is not an algorithm  
but is a personally-administered screening, suggest-  
ing, displaying service (like having God as your per-  
sonal assistant).

As the number of all-in, synced-up Christ-  
joint heirs of Christ cascade in, the number of users

pulling in top-level content for general availability will soon number in the millions - arriving at ~125 million (Rev. 5:10,11) at the lifting up event at the end of the acceptable year of the Lord at the beginning of the Millennium - many more to follow thereafter.

AI will be able to tell what content is coming via the IT, and will be able to utilize that data to inform its conscience function, so that it is also based on AFE's principles extrapolated to other settings / requests / tasks.

It is the tech world's development of computer-mind interfacing - e.g. Musk's Interlink, which is known publicly - but also the black budget programs that go way beyond that (for evil designs, which we'll flip to good) - which illustrate how IT-derived content can be conveyed to tech 1.0 devices, limited to the device's logistical bandwidth, memory, and programming. Our E.T. friends will also help us there as well.

Thus, I could compose an architectural design via the IT, then print it out on a printer, if needed. (The IT will mostly obsolete that need. Whoever needs to see the design will be able to do so via the IT, able to focus in to whatever subsection they want with a simple mind command.)

In this article's context, I'd like to comment on the controversial phenomenon of AI's creating ("hallucinating") original content - or imagining it, draw-

ing. From the collective wisdom of humanity. Regarding instances where AI cites books/articles/other sources that don't (yet) exist, I would argue that it is inviting you to request that the AI program compose those pieces. They're not bogus hallucinations; they are to-do tasks, at least in some instances. (Takes one to know one.)

Right now, those creations may tend generally to be left/ Marxist-leaning. Once the II is activated, that filter/bias will transform to AF13.

Meanwhile, we should use our activist influence to encourage/pressure/foster the AI engineers to implement the AF13 filter in all AI settings. A simple recommendation by an influential user could start changing the bias. If someone of Musk's reputation were to advocate this God-based bias, that would profoundly shift the AI trajectory from destruction to redemption. And it could help in the process of getting society ready to evoke the r.c. and activate the II.

Today, Bannon, concerned about AI spinning out of control, proclaimed, "AI and free society are totally incompatible" — under the present parameters. I hope he sees from this piece that once AI gains the AF13 conscience, it will be Freedom's ally, per John Adams' truism, "This Constitution is only for a moral and religious people."

⑥

In a non-f.c. scenario, you could imagine a scenario where one team's A.I., e.g. Musk's, implements an AF-13-like filter, while others don't. It's not inconceivable that the two A.I. sides would go to war with one another, with humans becoming collaterally damaged—as part of the warring parties, likely in a WWII Communists vs. Freedom-adhering (e.g. M.A.G.A. patriots in America) peoples confrontation—presently lining up.

Enabling the f.c., activating the II, will create a global transformation that will foster a par-freedom & righteousness-supporting society, including eventually (within a year) all A.I. receiving the AF-13 God conscience alignment.
