Sterling Daily (7/20/24): Pelosi Primary Driver Behind Scenes to Push Biden to Drop Out of Race - GMA

by Sterling D. Allan, 228033; USC F

July 20, 2024, Sat. News & Shows Highlights & [Commentary]

## News

6:40 a

- **GMA** Pelosi is the primary one behind the scenes pushing for momentum to get Biden to drop out of race.
- **Scraps** Tr. at rally in Grand Rapids, MI, 12k seats, lined up for blocks to get in (nearly full 2 hrs prior).  
Tr.: "I'm so glad I made choice of JD for VP. He's so good. I (love) Elon Musk, reusable rocket (so amazing). Now he's giving my campaign \$45 mil./mo. EVs are not for everyone (e.g. distance drivers)."  
• Crooks may have used drone [did] to scope out the site.  
Drone found in car.
- Sheila Jackson Lee dies @ 74 y.o.; Fmr. Dem. Cong. [Marxist]
- **NTD** Interview with NDE medical scientist, ~~and~~ Near Death Experience Research Foundation. "Evidence for NDEs is stronger than most tumor diagnoses. Observations very accurate to finest details. Those who have had an NDE typically <sup>become</sup> more loving, less materialistic, after change jobs (to something more fulfilling to them), get out of toxic relationships.

## Shows

5:30 a

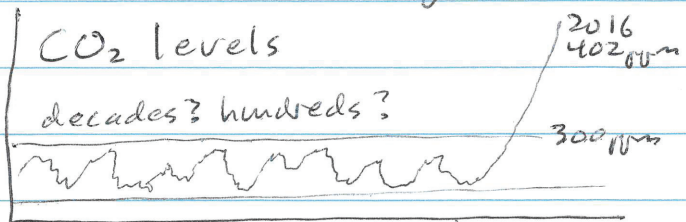

- **To The Rescue** Training a chicker (to illustrate how simple it is to train an animal), uses a clicker to signal when a reward (Food) has been won, No reward if error/shortcut.

- Video of ~~the~~ journey on (A) plane and (B) 48-hr (2) road trip of <sup>~100 total?</sup> many dogs, then given to receiving families (who adopt them following revival/renewal efforts).

 • EXPLORATION OUTER SPACE Moon quest through various admin.s  
 "Americans are headed to the cosmos" - Bush (Jr.), invites other nations to join "Constellation". Obama focused on Mars "we've already been to the Moon". DJT 2016 aims to return to Moon, then Mars → Artemis, 2019.

• NOVA Ancient Ice. Petrified forest shows with fossil leaves shows it used to be temperate. Has cycled between ice and temperate several times. Antarctic is size of US & Mexico, <sup>ice</sup> sometimes as thick as 3 miles. 20% of last 500 M years poles were warm. Our ice era started 32 M years ago. Greenland Frand withdrawing since ~1400.

Now ~1 mile/year. In recent times, earth's CO<sub>2</sub> levels have surpassed far outside usual ranges of fluctuation.

• Scraps Plastic - only 9% is recycled. Most ends up stacked in 3rd world, becoming brittle, polluting water. Microplastic found in human blood, ~~plate~~ placenta cells.

<sup>A</sup> Solution? Biological recycling by France Co; Carbos via mutant enzyme that breaks down the plastic. [toxicity?]
