Conservative media and leaders love to portray Biden as a dementia-impaired loon not fit for his job. While it's easy to see why they might give this assessment — greatly exaggerated — it's very problematic. Biden is not innocent by reasons of insanity. He knows what he is doing — sufficient to be guilty of his treason. He's completely committed to the Marxist Conspiracy to destroy US as a free nation.

I would argue that one of the roles of the controlled opposition among conservative hosts is to plant the "incompetent" narrative. (See my 11/19 editorial, "Saying 'Incompetent' Empowers Conspirators' Plausible Deniability.") This profoundly diminishes the vigilance we need, to discern the conniving going on. We need to expose the propaganda arguments, not attack the messenger *ad hominem* — a very weak/false rebuttal.
