Across conservative media to which I have access (RAV TV; KNRS 105.9 FM in SLC: Beck, Clay & Buck, Hannity, Jesse Kelly, Clyde Lewis), the primary, if not exclusive action item focuses on voting, running for office, supporting MAGA candidates.

However, that's only a small portion of the multi-faceted body of Christ. There are ~32.7 trillion cells in the average adult body - each performing different functions in a magnificent harmony.

Each of us ~7.7 billion humans have a unique mission in life. Finding and fulfilling that calling (Eph. 4:1) is the most important thing we can do. Embracing that calling all-in, synced up with our intuitive, divine link, is where the greatest joy and fulfillment can be found. Doing what we love, in tune with God's wisdom and power, performing miracles in our area of specialty, knowing that with God, nothing is impossible (Matt. 19:26), is how we bring heaven to earth, individually and collectively.

Part of our unique calling in life will include turning right-side-up things that are up-side-down in our area of specialty. Imagine millions of righteous people doing this worldwide.

②

We get the government we deserve. Tyranny is the fruit of unrighteousness. Freedom is the fruit of righteousness.

Focusing on electing MAGA candidates, while helpful, overlooks this principle of "we get what we deserve." [See my 8/14/22 editorial, "Core Remedy = Repentance."]

Yes, we all have a responsibility to discern and support righteous and gifted candidates, which will include MAGA Patriot principles. But we also have other tasks to tackle.

People like Ron DeSantis and Kari Lake—and, of course, Pres. Trump—clearly have a foreordination to political leadership. But I would argue that the school custodian who inspires young students to learn and embrace Judeo-Christian values is also a crucial part of the body of Christ. We all should be.
