T Full Measure: Spotlight on America: "Toxic Inaction"

FDA has known for 7 years that many baby foods have toxic levels of heavy metals (Lead, Arsenic, Mercury, Cadmium) in them, especially in cinnamon (2000x "toxic" level). FDA has authority to require testing by manufacturers but has not done so. ADHD & ADD among resulting neurological problems; lower IQ; developmental disorders. [I suspect that this is a function of the Marxist "unrestricted warfare."] Parents believe baby food protected by FDA. Lost trust.
