- Instructor/Facilitator <sup>J.J.</sup> had us inmates take turns role playing various combinations of "passive" or "aggressive" interactions over various scenarios (e.g. someone doesn't clean up mess in microwave after using it) I found all combinations contentious and not at all a model of how to best handle such a situation. Near the end, I pointed that out and suggested that next time, instead, we follow the bad example with a good example, giving critique about the best way to handle the situation. J.J. appreciated the suggestion.
