We, as a civilization are indeed at an epoch inflection point. The Marxist conspirators are in process of rolling ^{out} a tyrannical technocracy that will use our modern technology to keep everyone in line, contrary to principles of freedom and goodness — without God. The state becomes god, being 'who we must follow or be eliminated.

Part of their ^{intended} roll-out would be a melding of humans and technology ^{v.i.a.} implants, not just for tracking but also for ~~well as~~ control (hive mind). That's for the lay person. The "elites" who plan to run this mass machine giddily talk about the "Human 2.0" ^{version of mankind} that will include gene editing, implants, and even exoskeletons — like something from a science fiction movie.

I have a much different vision for mankind that is far superior to their artificial constructs. And I see it being something that could begin unfolding in

②
very rapid
weeks from now, with ^{very rapid} global adoption. ~~very~~
~~rapid~~

It's not technology-based, but ^{is a function of} divine gifts of the Spirit that become available to us when we sufficiently repent as a people. Such a revival is well under way thanks to the efforts of millions globally.

Remember, joint heirs of Christ (all-in, synced up) ^{<start>} will be able ^{to} do all the things Jesus did, and more. ^(John 14:12) That will include teleportation (see Teleportation editorial), telekinesis (moving/controlling matter with mind commands), ^{to} vim and thummin'-like access to all information ^(sans hardware & software) via the Infinite Interface (II, see "'We'll Never Know' = Not So" editorial), be restored to a youthful body (Job 33:25) to live through the Millennium, as well as performing other miracles.

The near-term future we have in store if we sufficiently repent (I'm confident we will), will be far more glorious/magnificent than what the evil cabal envisions ^(for us it would be hell on earth) for them ^{scapes} and we preserve freedom while enabling humanity, not enslaving them.
