

Google is More Dangerous than TikTok

I'm glad to see TikTok being increasingly removed from the United States due to its information-gathering (for the CCP) capability of its users as well as its unsavory content promulgation denigrating the moral fiber of the population.

However, Google is far more egregious, both in gathering data (for the CCP) about user views, preferences, activities; as well as in molding the users to a pro-Marxist world view.

Google is completely in the CCP camp, and its tools are far more powerful and sophisticated than TikTok. Similar could be said about other BigTech corporations.

BTW, the Infinite Interface (II, "two") I talk about (IIndComing.com) will render Google+ obsolete, unless they get on board with righteousness. The II's AF13 filter disallows the above problems. (Article of Faith 13: "We believe in being honest, true, chaste, benevolent, and in doing good to all men ..." - From Philip. 4:8.)
